Model Performance

Final Model

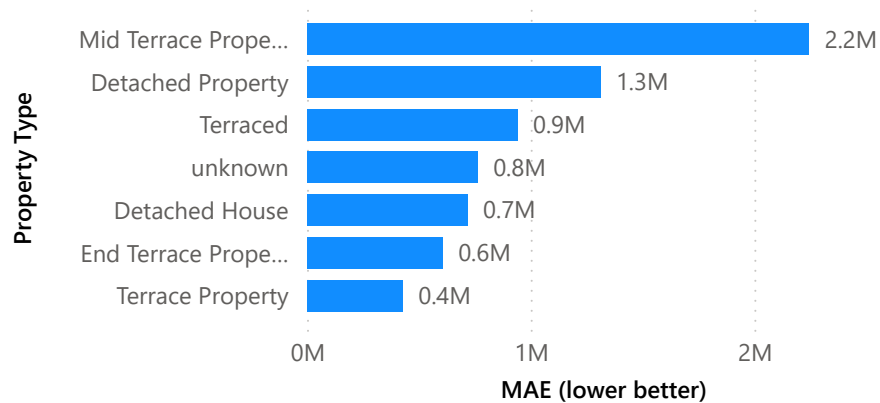

Manual LightGBM		
148.21K	0.84	990.00K
Average of MAE	R2	RMSE

The Manual LightGBM model was selected as the final model based on temporal holdout evaluation, achieving the lowest MAE of £148,213 and an R² of 0.836 when trained on pre-2022 data and tested on 2022–2024 transactions

Bias & Fairness

Prediction Error by Property Type (MAE)

Prediction Error by Tenure (MAE)

Prediction Error by Energy Rating (MAE)

Error is not evenly distributed. Prime central London outcodes (SW1X, W1K) show MAE above £1.5M. Flats show significantly lower error than houses, suggesting the model is more reliable for standardised property types.
